SASS/Less

Gulp/Webpack

Illustrator/Photoshop/XD

NPM/Yarn/Git

WordPress/Bootstrap

LANGUAGES

English

Norwegian

HOBBIES

Frontend/CSS drawings, Gaming, Documentaries, Walks, Brainteasers

PROFILE

I see myself as an ambivert with a lot of humor, good energy and a never-ending thirst for knowledge. I recently graduated as a frontend developer from Noroff, with As on all my exams, and an award for the best project of the year in 2020.

EDUCATION

Higher Professional Degree, Noroff — Oslo, Norway
Aug 2018 — Jun 2020

A 2 year vocational school with a huge focus on design (interaction design, UI, UX, design methods, etc) and JavaScript/React. Some skills learned at the school includes Redux, HTML5, SASS and npm, as well as thorough project planning and team work.

Student, Sonans — Oslo, Norway
Sep 2016 — May 2018

I took up some subjects to get my general study competence to later apply for the frontend-development study at Noroff

EMPLOYMENT HISTORY

Customer Service Specialist, Mr. Green LTD — Sliema, Malta
Jul 2017 — Dec 2017

I took a bread from Sonans and worked as a CS Specialist for the online betting company Mr. Green (and later also their sister company Garbo) over live chat, email and phone. Primarily I was working with customers in the EU, but also with customers all over the world if needed.

My role was to help customers with queries and issues, validate personal information for payment withdrawals in cooperation with the payments department, and most importantly keep an eye out for gambling addiction and make sure that customers played responsibly.

Dental Assistant, Stibor & Waller — Kongsberg, Norway
Jul 2014 — Mar 2016

I took calls and booked appointments, cleaned instruments, took x-rays, prepared chairs and needed tools etc between patients and made sure the clinic was clean. And of course a quick run to the coffee shop every now and then.

ADDITIONAL INFORMATION

I'll gladly share my final exam and other school projects upon request. Meanwhile there are a couple of projects I'd like to show off.

Tools used for these projects:
• HTML
• CSS/SCSS
• JavaScript
• Redux
• React

https://upbeat-beaver-e142e8.netlify.app/
This is the project that won Noroff's Diamond Award for project of the year 2020

https://vibrant-brown-215f63.netlify.app/
An older hobby project with illustrations made in pure CSS

I also want to attach an older portfolio with less relevant/hobby projects:
